SCREMATRICE CENTRIFUGA CV APERTA da lt. 50-800/h. PULITRICE PER LATTE APERTA da lt. 50-900/h.

- Baty è costituito in ACCIAIO INOX speciale satinato fine;
- . Gli organi in movimento sono montati su cuscinetti a sfera ad alta velocità;
- . Tamburo è costituito in Acciaio Inox speciale ad alta resistenza;
- . Dischi intermedi ed il disco superiore sono in acciaio inox e rigorosamente rettificati;

- . Motore elettrico tipo flangiato chiuso ermeticamente a ventilazione esterna. La macchina è stata studiata in ogni sua parte per consentire l'estrema facilità di manovra e per una facile pulizia;
- Il galleggiante è costituito in acciaio inox ed ha una funzione che permette un'alimentazione costante, anche con differenze di livello, sul serbatoio a monte della macchina;

Pulitrice su carrello

SKIMMER CENTRIFUGE MOD. CV OPEN suitable from lt.50 till 800/h.;

- Compartment made on unique, glossed stainless steel ;
- The components in motion are set on high-speed ball bearing ;
- Drum made on peculiar high-resistance stainless steel;
- Intermediate and superior discs made on stainless steel and strictly in a straight line;
- Electric engine flanged-type, hermetically closed, with outgoing air shaft.

The machinery has been carefully well-thought in every single part to allow easiness in maneuver and cleaning;
The flotation device is made on stainless steel and its function is to permit a constant feeding, even with level differences, on the tank placed at the top part of the machinery;

CLEANER MOD. CV OPEN FOR MILK

- Compartment made on unique, glossed stainless steel ;
- The components in motion are set on high-speed ball bearing ;
- Drum made on peculiar high-resistance stainless steel ;
- Intermediate and superior discs made on stainless steel and strictly in a straight line;
- Electric engine flanged-type, hermetically closed, with outgoing air shaft.

The machinery has been carefully well-thought in every single part to allow easiness in maneuver and cleaning;
- The flotation device is made on stainless steel and its function is to permit a constant feeding, even with level differences, on the tank placed at the top part of the machinery;
- Electric pump to allow the intake of milk, with level sensors; in stainless steel;
- Electric pump to pipe milk to the collection basin;
- Electric panel apt to control work process and drum rotation;
- Stainless steel transport truck furnished with feet for level regulation
